

What's New in DatAdvantage version 3.7

About This Document

This note provides a high-level overview of the new features available with Version 3.7 of Varonis DatAdvantage and assumes some familiarity with Varonis DatAdvantage. For more technical details on the features covered here, please refer to the "DatAdvantage 3.7 Release Notes".

Highlights of DatAdvantage Version 3.7

DatAdvantage version 3.7 introduces several new features and many new enhancements. The features covered in this document are:

- Support for event collection on Linux file servers
- User Interface enhancements
 - Quick navigation between Statistics and Log areas
 - "Not" function in search queries
 - Collapse and expand of work panes
- New Reports
 - Statistics: File Type Utilization
 - Executive Reports: Directory Size (file server utilization %), Usage by file types
 - Environment Report
- Administrative enhancements
 - Administrator enrollment to the Varonis license portal
 - Automatic Updates

New Feature	Description	Business Impact
Support for event collection on Linux file servers	Red Hat Enterprise Linux 4 and 5 are supported, with infrastructure in place within DatAdvantage to enable rapid support of other Linux distributions	Comprehensive visibility, auditing and recommendations for Linux, UNIX, Windows and NAS platforms, all from a single user interface
Quick navigation between Statistics and Log areas	From the Statistics area, administrators can right click on a chart and drill-down to the Log area to view the underlying data	Accelerated understanding of data use by seeing the data behind trends or actions
"Not" function in search queries	Log data can now be searched by excluding certain categories of results via a logical "NOT" operator	Faster problem identification and resolution when performing audits and forensic investigations
Collapse and expand of work panes	The ability to collapse and expand the various working panes was added throughout the DatAdvantage user interface	Easier to focus on specific tasks and data by viewing more task-specific data on a single screen
New Statistics and Report	File Type and Folder Size statistics and reports	Provides vital storage-size statistics to aid in archiving decisions, and provides trends and usage by file-type

New Feature	Description	Business Impact
New Executive reports	A new Directory Size report shows the volume of data that is not being actively accessed, and the new Usage by File Types reports shows data accessed by type of file	Quickly understand, characterize and communicate overall storage utilization
Environment Report	A new report with deployment details that can be used for troubleshooting by Varonis Support. Includes Varonis topology, hardware environment, monitored environment, etc.	Allows Varonis SEs and Technical Support staff to recommend optimal deployment and topology configurations and enables faster resolution of support issues
Administrator enrolment to the Varonis license portal	DatAdvantage Administrators can automatically connect to the Varonis license web portal and create an account from the DatAdvantage "About" box	Easy access to Varonis support materials including automatic problem ticket creation, the Varonis Knowledge Base, "How To" videos, software downloads, and other valuable resources
Automatic Updates	DatAdvantage can be configured to download updated database scripts automatically	Customers can ensure they have the latest updates, hotfixes, etc., without needing to manually monitor for or them.
